

Gil Johnson notes/comments on the [REDACTED] interview (11/12/2003) 7c

The following are my observations/questions on the [REDACTED] interview (11/12/2003)

ASSESSMENT QUESTION	YES/NO	AMPLIFICATION (WHY, WHY NOT, ETC.)
Will raise concerns and has done so before?	YES	We're going to get this fixed in a year or you can fire us; the CARB is fixed; if I don't fix it show me the door (5)
Raises concerns for others?	N/A	Not Discussed
Believes others raise concerns without hesitation?	YES/No	There are good and bad areas; Ups and downs; HP does consistently well; variable by time and circumstance; people censor themselves; don't dare to ask for an extension is self-censorship (1)
Knows of someone who has experienced retaliation for raising concerns?	Not Sure	Engineering Scheduler "managed out" (11)
Technical Issues identified	YES	ODCM revision (2) Safety Injection Valve (4) MG sets (6) Fuel Pool Leak; white stuff inside containment; affidavit that it's not RCS leakage; very high well sample (9) HC condenser in-leakage (12)
Production over Safety?	YES	Changed the game so we weren't producing results; CARB chairperson looking for a particular answer (regardless of facts); doesn't promote a safety conscious environment (3) Nothing wrong with the people, just playing the wrong game (7) I hope we are not going to some Herculean effort...smartest thing to do is lower power (8) When will you have the lithium analysis (10) I'm sure it has been...it's a continuum; not from Newark (13)
