SUBJECT: PALO VERDE NUCLEAR GENERATING STATION, UNITS 1, 2, AND 3 -
ERRATA TO AMENDMENT NO. 161, DATED JULY 27, 2006 (TAC NOS.
MC7182, MC7183, AND MC7184)

Dear Mr. Levine:

On July 27, 2006, the U.S. Nuclear Regulatory Commission (NRC) issued Amendment No. 161 to Facility Operating License No. NPF-41, Amendment No. 161 to Facility Operating License No. NPF-51, and Amendment No. 161 to Facility Operating License No. NPF-74 for the Palo Verde Nuclear Generating Station, Units 1, 2, and 3, respectively. The amendments consisted of changes to the Technical Specifications (TSs) in response to your application dated May 26, 2005, as supplemented by letters dated May 23 and June 20, 2006.

Through administrative errors, TS page 5.5-6 reflected the version contained in the May 26, 2005, application and did not reflect the version provided in the May 23, 2006, supplemental letter to address a specific NRC staff suggestion, and TS page 5.5-16 was not revised to reflect changes which had been previously approved in Amendment No. 157. In addition, the July 27 approval letter did not list the additional pages in TS Section 5.5 that need to be removed (pages 5.5-17 through 5.5-24) to account for the removal of pages due to the smaller new steam generator inspection program in TS Section 5.5.9. This letter transmits an errata to Amendment No. 161 correcting the effected pages.

Enclosed are the updated TS pages to the license. If there are any questions concerning this letter, please contact me at (301) 415-3062.

Sincerely,

/RA/
