lwcl@nrc.gov

Dear Dr. Chang:

Nuclear Information and Resource Service and Sierra Club request an extension of time to comment on the proposed rule regarding Requirements for Expanded Definition of Byproduct Material, 71 FR 145:42952-42994, July 28, 2006.

We have a history of interest and active participation in the issues being covered by this rulemaking and believe we have valuable insights and input that should be considered. We also work with numerous other organizations that would provide important perspectives on the decisions being made.

The rule appears to cover not just additional regulatory responsibility for the Nuclear Regulatory Commission but also reevaluation of existing responsibilities and how to carry them out.

We understand there are deadlines involved in this rulemaking but also believe that Congress would want you to get input from the public interest organizations and individuals impacted by this rulemaking.

Please extend the comment period until the end of October, to allow interested public interest organizations and individuals to provide comments.

Thank you.

Sincerely,

Diane D'Arrigo  
Radioactive Waste Project Director  
Nuclear Information and Resource Service

Dr. Judith Johnsrud  
Senior Advisor  
Sierra Club
