Jason Bish, V.P. Safety and Eric Olson	Fred Weber, Inc.	314-344-0070 ext. 239
Radiation Safety Officer, Designate	Maryland Heights, Missouri	FAX            -0970

SUBJECT

Control No. 315647 – Re - Amendment request by letter dated August 11, 2006, regarding change of Radiation Safety Officer (RSO) for NRC License No. 24-32558-01, from Joseph G. Ulrich to Eric Olson.

SUMMARY

In a telephone conversation on 8-30-2006 with both Mr. Bish and Mr. Olson on line, Mr. Olson, confirmed that he was aware of his appointment as RSO and of the duties and responsibilities the position entails.

Also, in accord with current NRC policy in support of security issues, we discussed the need for the licensee to specify a total possession limit, to be added to License Item 8 for each radioisotope (Cesium-137 and Americium-241) listed in License Item 6 of the subject license. I related that the possession limit did not have to be limited to their current total possession but could allow for temporary replacement of gauge(s) and/or for planned expansions in gauge usage. After discussion, Mr. Olson requested a possession limit of 60 millicuries for Cesium-137 and 900 millicuries for Americium-241.

I also noted that we would be modifying the license condition addressing "locking criteria" to incorporate the more stringent criteria now required. Mr. Olson confirmed that the licensee is aware of and complying with that criteria.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this conversation record will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

ACTION REQUIRED

License reviewer to amend license as requested based on the above information.
