

**MATERIALS LICENSE**

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Amendment No. 28

6. Byproduct, source, and/or special nuclear material	7. Chemical and/or physical form	8. Maximum amount that licensee may possess at any one time under this license
K. Manganese-54	K. Any	K. 200 millicuries
L. Lutetium-177	L. Any	L. 500 millicuries
M. Technetium-99	M. Any	M. 30 millicuries
N. Molybdenum-99	N. Any	N. 30 curies
O. Technetium-99m	O. Any	O. 30 curies
P. Cobalt-60	P. Any	P. 1 microcurie
Q. Gadolinium-153	Q. Any	Q. 1 microcurie
R. Terbium-160	R. Any	R. 60 microcuries
S. Thulium-170	S. Any	S. 45 microcuries
T. Holmium-166m	T. Any	T. 150 microcuries

9. Authorized Use:

A. and B.

- (1) Research and development as defined in 10 CFR 30.4 involving bio-tracer studies in animals and plants and in field studies as described in letter dated September 9, 1996.
- (2) For possession, use, and processing incident to manufacture of radiochemicals.
- (3) For storage prior to distribution of manufactured radiochemicals.
- (4) For packaging and distribution of manufactured radiochemicals to persons authorized to receive the licensed material pursuant to the terms and conditions of specific licenses issued by the Nuclear Regulatory Commission or Agreement State.
- (5) For iodine-125, the licensee shall not obtain material in volatile form until the fume hood(s) have been tested to assure compliance with the release concentrations listed in 10 CFR Part 20, Appendix B, Table 2.

Amendment No. 28

C. and D. For use in gas chromatographs for sample analysis and for cleaning.

E. Possession incident to interim storage of waste in accordance with statements, representations and procedures contained in letter dated September 9, 1996.

F. To be used as calibration sources.

G. Research and development as defined in 10 CFR 30.4 involving bio-tracer studies in animals and plants and in field studies as described in letter dated September 9, 1996.

H. through J. For instrument calibration.

K., L., and M. Research and development as defined in 10 CFR 30.4, possession, use and processing incident to manufacture of radiochemicals; storage prior to distribution of manufactured radiochemicals; and packaging and distribution of manufactured radiochemicals to persons authorized to receive the licensed material pursuant to the terms and conditions of specific licenses issued by the Nuclear Regulatory Commission or Agreement State.

N. and O. Research and development as defined in 10 CFR 30.4.

P. through T. Research and development as defined in 10 CFR 30.4 including studies in animals described in letter dated April 15, 2003.

CONDITIONS

10. Licensed material shall be used only at the licensee's facilities located at 7200 East ABC Lane, Columbia, Missouri.

11. A. Licensed material shall be used by, or under the supervision of, individuals designated in writing by the Radiation Safety Committee, Kevin Roberson, Chairperson.

**B. The Radiation Safety Officer for the activities authorized by this license is Sheila C. Hecht.**

12. This license does not authorize commercial distribution of licensed material to medical use licensees pursuant to 10 CFR 32.72, to persons generally licensed pursuant to 10 CFR Part 31 or equivalent regulations of any Agreement State or to persons exempt from licensing pursuant to 10 CFR 30.14 through 30.20 inclusive, or equivalent regulations of any Agreement State.

13. The licensee shall not use licensed material in or on human beings.

**MATERIALS LICENSE  
SUPPLEMENTARY SHEET**

License Number

Docket or Reference Number  
030-05154

Amendment No. 28

14. The licensee shall provide the following information to customers licensed by the NRC or an Agreement State for human use:
- products manufactured by ABC Labs, Inc. are required to be prepared by a radiopharmacist licensed by the NRC or Agreement State prior to human use; or
  - prepared by a physician who is an authorized user and who meets the requirements specified in 10 CFR 35.920, or equivalent Agreement State regulation; or
  - prepared by an individual under the supervision of either as specified in 10 CFR 35.25 or an equivalent Agreement State regulation.
15. The licensee shall notify, in writing, the NRC within 3 years of issuance of Amendment No. 17, the status of activities authorized by this license as it pertains to broad scope activities and to the manufacture and distribution of radiochemical products. If said activities have not been initiated within the 3 year period, the licensee shall provide a basis for continuance of such authorizations. The report shall be filed with the U.S. Nuclear Regulatory Commission, Region III, ATTN: Branch Chief, Materials licensing Branch, 801 Warrenville Road, Lisle, Illinois 60532-4351.
16. The licensee shall not use licensed material in field applications where activity is released except as provided otherwise by specific conditions of this license.
17. Except as otherwise specified in this license, the licensee shall have available and follow the instructions contained in the manufacturer's instruction manual for chromatography devices.
18. The licensee shall conduct a physical inventory every 6 months to account for all sources and/or devices received and possessed under the license.
19. **A. Sealed sources shall be tested for leakage and/or contamination at intervals not to exceed 6 months or at such other intervals as specified by the certificate of registration referred to in 10 CFR 32.210.**
- B. In the absence of a certificate from a transferor indicating that a leak test has been made within the interval specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or by an Agreement State, prior to the transfer, a sealed source received from another person shall not be put into use until tested.**

**MATERIALS LICENSE  
SUPPLEMENTARY SHEET**

License Number

Docket or Reference Number  
030-05154

Amendment No. 28

- C. Sealed sources need not be tested if they are in storage and are not being used. However, when they are removed from storage for use or transferred to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.**
- D. The leak test shall be capable of detecting the presence of 0.005 microcurie (185 becquerels) of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie (185 becquerels) or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 16 CFR 30.50(c)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations.**
- E. Tests for leakage and/or contamination, including leak test sample collection and analysis, shall be performed by the licensee or other persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.**
- F. Records of leak test results shall be kept in terms of microcuries and shall be maintained for 3 years.**
20. In accordance with 10 CFR 20.2002, the licensee may dispose of hydrogen-3 and carbon-14 by the land application method described in the letter dated September 9, 1996, in such a manner that limits waste water entering the lagoon to concentrations not exceeding those specified in 10 CFR 20.2003.
21. The licensee is authorized to transport licensed material only in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."
22. Experimental animals, or the products from experimental animals, that have been administered licensed materials shall not be used for human consumption.
23. **The licensee is authorized to hold radioactive material with a physical half-life of less than 120 days for decay-in-storage before disposal in ordinary trash provided:**
- A. Before disposal as ordinary trash, byproduct material shall be surveyed at the container surface with the appropriate survey meter set on its most sensitive scale and with no interposed shielding to determine that its radioactivity cannot be distinguished from background. All radiation labels shall be removed or obliterated.**
- B. A record of each disposal permitted under this License Condition shall be retained for three years. The record must include the date of disposal, the date on which the byproduct material was placed in storage, the radionuclides disposed, the survey instrument used,**

Amendment No. 28

**the background dose rate, the dose rate measured at the surface of each waste container, and the name of the individual who performed the disposal.**

24. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. The Nuclear Regulatory Commission's regulations shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.
- A. Letters dated September 9, 1996 (with enclosures), February 28, 1997 (with attachments), August 5, 1998, September 30, 1998, (items 1 through 4 only), October 7 1998, (excluding all reference to distribution of synthesized products), October 9, 1998, January 13, 1999, October 22, 1999 (excluding reference to medical distribution), January 18, 2000, March 30, 2000, April 6, 2001, January 31, 2003, April 15, 2003; August 26, 2003 (excluding reference to the Chair of the Radiation Safety Committee), November 2, 2005 and November 30, 2005.
- B. Fax transmittals dated **October 21, 1998** and **April 14, 2003**.
