SUBJECT: ACCEPTANCE FOR TECHNICAL REVIEW OF THE DECOMMISSIONING
PLAN FOR THE NEWFIELD FACILITY (TAC NO. L52094)

Dear Mr. Smith:

By letter dated June 30, 2006, (ML061980092) Shieldalloy Metallurgical Corporation (SMC) submitted "Supplement to Decommissioning Plan" for the SMC facility in Newfield, NJ. The June 30, 2006, document supplements Rev. 1 of the Decommissioning Plan (DP) (ML053190215) for the Newfield facility, which the U.S. Nuclear Regulatory Commission (NRC) staff rejected on January 26, 2006 (ML060180551). The DP was rejected because our expanded acceptance review identified deficiencies in the document for: dose modeling, surface water hydrology and erosion protection, institutional controls, and financial assurance.

The NRC staff used the guidance in NUREG-1757 (Consolidated NMSS Decommissioning Guidance), Vol. 1, Section 5.3 and the May 15, 2004, interim guidance for a long-term control (LTC) license at the SMC site for conducting its administrative acceptance review of the supplement. We have determined that the information provided in the supplement, along with the DP, is sufficient to begin the technical review. Please note that the technical review may identify omissions in the submitted information or technical issues not identified during the administrative review that require additional information. If you have any questions about this letter, please contact me at (301) 415-7295.

Sincerely,

/RA/

Keith I. McConnell, Deputy Director
Decommissioning Directorate
Division of Waste Management
and Environmental Protection
Office of Federal and State Materials
and Environmental Management Programs
