SUBJECT: TERMINATION OF YOUR NRC RADIOACTIVE MATERIALS LICENSE,
LICENSE NO. 21-14922-01

Dear Mr. Kling:

By application dated June 15, 2006, you requested that the U.S. Nuclear Regulatory Commission terminate your NRC radioactive material license, License No. 21-14922-01, (expiration date of April 30, 2013). This license authorized portable gauge storage at your facility located at 320 N. Farmer Street, Otsego, Michigan and usage at temporary job sites of the licensee anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material. You provided information confirming the transfer of all twelve gauges covered by the referenced license (plus two gauges possessed under a General License) to another licensee, QSA Global, Inc., Baton Rouge, Louisiana, authorized to receive them, for the purpose of disposal. You also provided current leak test records, of all sealed sources requiring leak testing, confirming the non leaking status of these sources and confirmed that no leaking sealed sources have ever been identified based on routine leak test data. Based on information you have provided to us, we have concluded that licensed material is no longer used or possessed under NRC License No. 21-14922-01, and that appropriate criteria are met that permit us to terminate the license as requested. Accordingly, an amendment is enclosed terminating your NRC License No. 21-14922-01.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (The Public Electronic Reading Room).

Sincerely,

A handwritten signature in cursive script that reads "Loren J. Hueter".
