

## WEEKLY REPORT TO THE COMMISSION

### OFFICE OF NUCLEAR MATERIAL SAFETY AND SAFEGUARDS

#### Proposed Rule Signed by EDO

On September 22, 2006, the Acting Executive Director for Operations approved a proposed rule which revises 10 CFR Part 72.214, "List of approved spent fuel storage casks," revising the Holtec International HI-STORM 100 cask system listing within the "List of approved spent fuel storage casks." This amendment would revise Technical Specification (TS) 3.1.3 to eliminate cooling of the Multi-Purpose Canister (MPC) cavity prior to reflood with water as part of cask unloading operations; TS 3.3.1 to allow linear interpolation between minimal soluble boron concentrations for certain fuel enrichments in the MPC-32/32F; Appendix B, Section 1, to make modifications to the definitions of fuel debris, damaged fuel assembly, and non-fuel hardware; and Appendix B, Section 2, to permit the storage of pressurized water reactor fuel assemblies with annular fuel pellets in the top and bottom 12 inches of the active fuel length. Other changes would be made to incorporate minor editorial corrections.
