Subject: Response to NRC Regulatory Issue Summary 2006-15
"Preparation and Scheduling of Operator Licensing Examinations"

Reference: NRC Regulatory Issue Summary 2006-15, "Preparation and Scheduling of Operator
Licensing Examinations," dated August 14, 2006

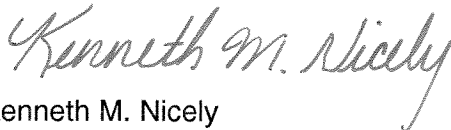

The referenced Regulatory Issue Summary (RIS) requested that facility licensees provide a proposed schedule of these examinations and an estimate of the number of candidates to be tested in site examinations and the Generic Fundamentals Examinations (GFEs) for calendar years 2007 through 2009 including an estimate for calendar year 2010.

In calendar years 2007 and 2009, 6 candidates are expected to take the dual site Limited Senior Reactor Operator (LSRO) initial license examination as indicated on Attachment 8. The schedule for the indicated exam is as follows: the written exam and part of the operating exam will be given at Limerick Generating Station (LGS); the remainder of the operating exam will be completed at Peach Bottom Atomic Power Station (PBAPS). Since the LSRO exam is a dual site exam that involves both LGS and PBAPS, rather than repeating the same information on both attachments, the exam scheduling information is provided on Attachment 8 for PBAPS and Attachment 6 for LGS references Attachment 8 where necessary.

Attachments 1 through 10 provide the responses to RIS 2006-15 for the Exelon Generation Company, LLC (EGC) and AmerGen Energy Company, LLC (AmerGen) plants identified above.

The operator licensing examination information for each facility is provided on a separate NRC Form 536. If you have any questions about this letter, please contact David. J. Chrzanowski at (630) 657-2816.

Respectfully,

Kenneth M. Nicely
Manager - Licensing
