Re: Amendment to License #37-28518-01

03031690

Dear NRC Official:

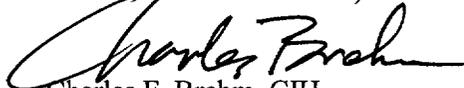

As discussed with Jim Schmidt (NRC) and George Marshall (Troxler) today, Michael Baker Jr. Inc. has placed an order to purchase a Troxler Model 3450 gauge device, and would like to amend our license to remove ambiguity regarding authorization to use any Model 3400 series Troxler gauge. We confirmed with Mr. Marshall that the sealed sources for the Model 3450 are consistent with our license. The current license language in section 9 authorizes use: of "Model No. 3400 series (includes Model Nos. 3440, 3430M, 3440, and 3440-M) portable gauging devices." We would like to eliminated the information contained in parenthesis that names model numbers, and simply leave the document reading as-is regarding the Model No. 3400 series.

Because this change is so minor, and Troxler is holding up shipment of the ordered device, Baker requests that the NRC kindly expedite this license amendment request.

If you have any questions, or require additional information, please contact me at 412-375-3166 or via e-mail at cbrehm@mbakercorp.com.

Sincerely,

MICHAEL BAKER JR., INC.
