Name of Participant(s):	Glenn Bouscher, HLC (RSO) Gerald Williams, Enercon	
Telephone No.	Bouscher 304-387-1300 Williams 724-733-8711	
Subject: <small>(NOTE: This will be used as the Documents Title in ADAMS)</small>	Current Status	
Summary:	<p>A call was first placed to Glenn Bouscher, RSO for HLC. Glenn stated he received a report in August 2006 from Enercon with the results of the initial random sampling they conducted in the first quarter 2006. There are approximately fifty containers of waste. To date at least two containers appear to contain mixed hazardous waste, uranium and lead. HLC is expecting to receive a bid from Enercon in mid-October 2006 for a complete sampling and characterization of the waste.</p> <p>A call was then placed to Gerald Williams, environmental contractor, with Enercon. Gerald stated that the initial random waste characterization indicated a fair amount of variability in the waste composition. Some of the waste contained only chemical waste, some contained U and lead, and some did not contain any hazardous waste at all. Because of the variability a Enercon is proposing to perform a complete characterization of each waste container. A bid will be sent to HLC in October 2006 to do this. If accepted Enercon is prepared to do the sampling in late October 2006 and gets the results to HLC in late November 2006. Enercon will also provide information as to where each type of waste may be disposed of and potential waste brokers for each type of waste. HLC will then request separate bids from the various waste brokers for waste disposal.</p>	
Action Required:	follow up with Glenn and Gerald in about three months to check on status.
