RE: License Amendment request for additional information
NRC License # 21-01190-05

Dear Mr. Reichold:

Please find the addition information that you requested pursuant to our phone conversation today.

Item #1: My position at Medical Physics Consultants allows me adequate time and flexibility to address both my contractual and regulatory obligations to any facility that I am currently listed as the Radiation Safety Officer.

The position of Radiation Safety Officer is what we are contracted for by these facilities. All facilities have a signed contract by both them and Medical Physics Consultants. These contracts clearly outline both my responsibilities and the facilities. All facilities have also signed a RSO / Management Agreement form which has been forwarded to the NRC in all applications and / or amendments.

I am a board certified by the American Board of Radiology in Medical Nuclear Physics, Diagnostic Radiological Physics. Additionally I am certified by the American Board of Medical Physics in Medical Health Physics. I have over 25 years of experience in Nuclear Medicine. This is my livelihood and my occupation.

All facilities are audited on a quarterly basis which is standard of practice. These audits are forwarded to both management and the supervising technologist. These audits are reviewed and signed by both of these individuals. Any items that require attention are documented by the supervising technologist.

Please review the previous inspection history of any facility that I have been listed as the Radiation Safety Officer and you will find that I have an excellent track record with respect to compliance to NRC regulations.

Item #2: The amount of time for me to respond to an emergency involving radioactive material will vary depending upon my activities that day. Typically I would be able to respond immediately by phone. All facilities have both my cell phone and office phone numbers. The office staff at Medical Physics Consultants has a copy of my daily schedule at all times. The staff has phone numbers to any location that I might be working.

Medical Physics Consultants has an answering service that operates 24 hours a day, 7 days a week, 365 days a year. They have phone numbers for my home cell and office. If for some reason they are not able to contact me, they have a list of other physicists that are employed by Medical Physics Consultants to contact. These individuals are also board certified physicists with a great deal of expertise. This same mechanism has been in place for years whenever one of our facilities is in need of immediate expertise and advice. If we are contacted for a radiological emergency we direct the account to notify the appropriate management individual.

As stated earlier we audit the program quarterly, any unsafe practices or incidents are reported to management in writing. Items of significant concern are always reported to management verbally in addition to the written documentation.

Item #3: The amount of time that I will spend at St John Macomb Hospital will vary. Time will depend upon the status of the Radiation Protection Program and other variables. As stated above quarterly reports are sent to management.

Item #4: All individuals who handle or have access to radioactive material are overseen by a supervisor. These supervisors reports directly to management and the Radiation Safety Officer. All individuals are in-serviced yearly. Management in their license application have committed to supplying the necessary resources for these individuals to achieve regulatory compliance. Additionally, they have committed to this in the RSO / Management Agreement letter.

If you have any questions or if I may be of assistance, please contact me by phone at (734) 662-3197 or by e-mail at jbotti@mpcphysics.com.

Respectfully Yours,

James M. Botti, MS
Radiological Physicist
Board Certified, ABR, ABMP
