SUBJECT: ANALYTICAL RESULTS FOR 10 WIPE TEST SAMPLES FROM ACCELINER SERVICE COMPANY, LTD., DOING BUSINESS AS ONCOLOGY SERVICES, INTERNATIONAL, LAKEWOOD, NEW JERSEY [INSPECTION REPORT NO. 9990001/2006-026] (RFTA NO. 06-001)

Dear Mr. Ragland:

The Oak Ridge Institute for Science and Education (ORISE) received 10 wipe test samples on March 22, 2006 that were collected at Acceliner Service Company, Ltd., on March 15, 2006. The samples were analyzed using a low-background alpha/beta counter (Procedure CP3, Revision 2). The alpha Minimum Detectable Concentration (MDC) was 8.9 dpm/wipe and the requested beta MDC was 50 dpm/wipe. The alpha and beta data are presented in Table 1. In addition, a qualitative gamma spectroscopy analysis was requested on wipe DU2 to determine if the contamination on the wipe was depleted uranium (DU). This wipe was screened by gamma spectroscopy (Procedure CP1, Revision 15). The ratio of the uranium-235 concentration to the uranium-238 concentration by thorium-234 was 0.01 indicating that the contamination on the wipe was DU.

ORISE's Quality Control (QC) requirements were met for these analyses. The QC files are available for your review upon request.

My contact information is listed below. You may also contact Wade Ivey at 865.576.9184 with any questions or comments.

Sincerely,

Dale Condra, Manager
Laboratory
