Amendment to NRC license No. 52-24916-01, control number 139173

Dear Ms. Janda:

This letter is to inform you that all of the I-125 seed have been transferred to Metropolitan Hospital NRC license number 52-16033-01. The same physicians that used the I-125 seeds at Manata Medical Center also used the I-125 seeds at this hospital. The seeds have already been added to the Metropolitan Hospital inventory and will be returned to the vendor for disposal at a later date.

Therefore, Manati Medical Center will not need to have permission to store the I-125 seeds at their facility.

If you need additional information, please feel free to contact David Rhoe at 787-245-7248.

Sincerely,

  
David Rhoe  
Consultant
