Re: Amendment to NRC License 07-28762-02G

03032989

September 19, 2006

Dear Sir or Madam,

Agilent Technologies, Inc. requests an amendment to the above referenced license. Please make the following changes to the model numbers listed in line 11 of the license:

- Model: 19233
Change the Maximum Activity Per Source to 18
- Models 19282 and 19312:
Delete both model numbers as they are no longer sold or supported.

From an administrative standpoint, please note that the maximum activity per source column in line 11 does not indicate units. Agilent requests consideration of indicating this to be in millicuries.

This request is being submitted, in part, to reflect the accurate possible maximum activity for the plated source in the model 19233 ECD as provided by the plating vendor. Agilent Technologies, Inc. has submitted an amendment request to its SS&D registry NR-0348-D-109-B to reflect the change in maximum activity.

Please contact the Radiation Safety Officer, David Bennett, at 302-633-8262 for further information.

Sincerely,

Keith Morgan
LFS/LSCA Environmental, Health, and Safety Manager
