Paul,

RE: Reynolds Ranch License Application

There appears to be an inconsistency in above referenced Power Resources License Application. More specifically Chapter 5, Section 5.1.5.4 "Restoration Target Values"

The Restoration Target Values (RTVs) are determined from the baseline water quality data and are used to assess the effectiveness of ground water restoration activities. The average and range of baseline values determined for wells completed in the production zone within the wellfield area (i.e. MP-wells), constitute the RTVs. If.....

The above underlined information should be replaced with "mean plus two standard deviations".

This is the same information listed in Chapter 6, 6.1.1 "Water Quality Criteria"

Thank you,

John McCarthy  
Power Resources, Inc.
