

October 11, 2006

Mr. Robert Meisenheimer
SRS Citizens Advisory Board
WM Committee Chair
46 Haul Way Road
Hilton Head Island, SC 29928

SUBJECT: RESPONSE TO COMMENTS ON STANDARD REVIEW PLAN AND WASTE
DETERMINATION STREAMLINING

Dear Mr. Meisenheimer,

I am responding to your September 21, 2006, letter in which you provided comments on the U.S. Nuclear Regulatory Commission's (NRC's) draft Standard Review Plan for Activities Related to U.S. Department of Energy (DOE) Waste Determinations, NUREG-1854 (SRP). I appreciate your positive feedback regarding the SRP approach and the public meeting that was held regarding disposal of salt waste at the Savannah River Site. With respect to DOE concerns about the SRP, we are currently working with DOE to schedule a meeting to discuss the issues raised in their July 31, 2006, letter. This meeting will be open to the public and announced on our website: www.nrc.gov. In addition, a meeting summary will be made publicly available after the meeting is held. The NRC and DOE are continuing to examine ways to make the waste determination review process as efficient and effective as possible.

Please contact me at 301-415-5228 if you would like more information about the SRP or the meeting with DOE.

Sincerely,
/RA/

Anna H. Bradford, Senior Project Manager
Environmental and Performance
Assessment Directorate
Office of Federal and State Materials and
Environmental Management Programs
