RE: Closeout survey for Radioactive Material license No. 37-30735-01  
Donohue Cardiology Associates

Gentlemen:

We have decommissioned our Bethel Park office. All radioactive materials have been removed from the lab. The following is a close-out survey performed on September 19, 2006.

Gross contamination smears were taken on all walls and on the floors, doors, and door knobs of the hot lab and scan room. The smears were counted in a Capintec Captus 200 well counter with an efficiency for Tc-99m which is greater than 90% and minimum detectable activity of 106. Area radiation level surveys were taken at each smear site. The background for the area surveys was 0.02 mR/hr using a Bicorn 2000 survey meter last calibrated on March 22, 2006. All readings were 0.02 mR/hr.

The following are the smear results. Background was 423 cpm. A gross smear was taken on all walls, floor, door and door handle.

Area #	DPM above background
Gross	14

All radioactive material has been removed from the site and we have released the room for unrestricted use.

Sincerely,

*Patricia R. Edwards*

RE: Amendment Request for Radioactive Material license  
No. 37-30735-01  
Donohue Cardiology Associates

Gentlemen:

Please delete or Bethel Park office from our license effectively immediately. We have removed all radioactive materials and have performed a close out survey (enclosed).

If you have any questions or require additional information, please do not hesitate to contact the undersigned.

Sincerely,

  
Administrator

This is to acknowledge the receipt of your letter/application dated

9/20/2006, and to inform you that the initial processing which includes an administrative review has been performed.

Amendment 37-30735-01 There were no administrative omissions. Your application was assigned to a technical reviewer. Please note that the technical review may identify additional omissions or require additional information.

Please provide to this office within 30 days of your receipt of this card
