## Westinghouse Exposure and Effluent Data:

Occupational Exposure ICRP 68 Model	<u>TEDE</u>		
		<u>Collective Dose</u>	<u>Maximum</u>
	2002	279 person-rem	1.57 rem
	2003	245 person-rem	1.53 rem
Radioactive Liquid and Gaseous Effluent Releases	2004	236 person-rem	1.39 rem
		<u>Liquid (mCi)</u>	<u>Gaseous (<math>\mu</math>Ci)</u>
	2002	U 64.2	556
	2003	U 54.4	510
Maximum Offsite Dose due to Gaseous Releases	2004	U 50.0	598
	2002	< 1 mrem	
	2003	< 1 mrem	
Labor/Union Issues	2004	< 1 mrem	
	None		
Major Management Changes	<p>4/01 - S. McDonald appointed Manager, Regulatory Affairs, replacing D. Goldbach</p> <p>6/02 - Bob Monley stepped down from the Plant Manager Position into the Production Supervisor position directly under the new Plant Manager. Mark Fecteau became the new Plant Manager. Mr. Monley ultimately left Westinghouse.</p> <p>2004- The licensee restructured their organization by splitting some functions into separate organizations. Chemical Operations used to include URRS and conversion, and was headed by D.J. Precht. The reorganization created a separate function for URRS, with Carlos Aguilar as manager, and a separate function for conversion and pelleting with Robbie Gale as manager. Gary D LaBruyere was reassigned from manager of Mechanical Operations to the recently created Human Performance branch and was also acting for the Continuous Improvement branch. J.C.Rue was acting for the position he left as Mechanical Operations manager.</p> <p>2005- Mr. Precht is on a special assignment within Westinghouse, and Robby Gale has moved to another Westinghouse facility (personal decision). Carlos Aguilar is still manager of URRS, Fred Jackson has been assigned as the acting manager for conversion, and Hal Brownlee has been assigned as the acting manager of pelleting.</p>
