3. DOCKET NUMBER(S) 030-37040	4. LICENSEE NUMBER(S) 24-32598-01	5. DATE(S) OF INSPECTION September 19, 2006	

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

1. Based on the inspection findings, no violations were identified.

2. Previous violation(s) closed.

3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied.

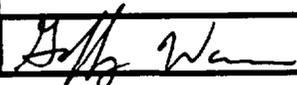

_____ Non-Cited Violation(s) was/were discussed involving the following requirement(s) and Corrective Action(s):

4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.

(Violations and Corrective Actions)

Licensee's Statement of Corrective Actions for Item 4, above.

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

PROGRAM SCOPE

This was an initial inspection of activities performed under this NRC license. However, the licensee had not yet begun licensed operations or acquired material under this license, and had no plans to do so in the near future. Because of this, in accordance with MC 2800, the next inspection was set at one year.

Licensee was a clinic located in the North Medical Building at St. Luke's Hospital in Chesterfield, Missouri, that was licensed to perform activities under Section 35.100 and 35.300, limited to iodine-131. The facility was as described in the license application. Licensee had hired a consultant to ensure that, if licensed activities are commenced, all license and regulatory requirements will be met.
