Dear Mr. Rausch:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examinations at the Oyster Creek Generating Station.

The NRC has completed its review of the revised operator license applications submitted on September 29, 2006, in connection with this examination and separately provided a list of approved applicants to Mr. Julius Vaccaro, Director of Training. Note that any examination waivers and application denials have been addressed in separate correspondence.

The NRC has approved the subject examinations and hereby authorizes you to administer the written examinations in accordance with Revision 9 of NUREG-1021, "Operator Licensing Examinations Standards for Power Reactors," during the week of October 9, 2006. The NRC staff will administer the operating tests during the week of October 2, 2006.

Please contact your Chief Examiner, Mr. Joseph D'Antonio, at 610-337-5085, if you have any questions or identify any errors or changes in the license level (RO or SRO) or type of examination (partial or complete written examination and/or operating test) specified for each applicant.

Sincerely,

/RA/
