Withdrawal of Technical Specification Change Number  
2005-04

By letter dated September 15, 2005 Duke requested the Nuclear Regulatory Commission (NRC) approve Technical Specification Change Number 2005-04 regarding adoption of Generic Letter 96-03, "Relocation of the Pressure Temperature Limit Curves and Low Temperature Overpressure Protection System Limits". Duke has had numerous discussions with the NRC regarding this submittal and has informally responded to a Request for Additional Information (RAI).

As a result of recent discussions between Duke and the NRC, as well as other considerations, Duke has decided to withdraw this submittal and re-submit a revised request at a later date.

If there are any questions regarding this submittal, please contact Reese' Gambrell at (864) 885-3364.

Very truly yours,

B.H. Hamilton, Vice President  
Oconee Nuclear Site
