Insmmed, Incorporated
License No.: 45-25404-01
Docket No: 030-34506
Control No: 139494

To: Leigh Haynes, Insmmed
From: Betsy Ullrich, Senior Health Physicist, USNRC, Region I Office

Please provide the following additional information, as we discussed by telephone a few minutes ago this morning:

1. Provide the date(s) of the surveys of the laboratories.
2. Confirm that the radioactive source from the liquid scintillation counter is transferred to the manufacturer.

If the source is possessed under a general license in accordance with 10 CFR 31.5 (as many LSC sources are), you need to provide a report to the NRC of the transfer/disposal of this source. Send the report to "Director of Nuclear material Safety and Safeguards, ATTN: Document control Desk/GLTS, US Nuclear Regulatory Commission, Washington, DC 20555-001".

If the source is exempt from licensing, or is material that is not regulated by the NRC, then no report is needed.

3. Provide an estimate of the square footage of the laboratories used for work with NRC-licensed materials, an estimate of the square footage of the building, and a description of the type of area your facility is located in (urban/suburba/rural and commercial/industrial/residential/office park etc)

Please note that you may not reply to this letter by return e-mail. Your reply must be in writing by letter or facsimile (610-337-5269). If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your application.

Please call or email if you have any questions. I can be reached at (610) 337-5040 or exu@nrc.gov.
