The Seabrook Station quality assurance program was submitted to the NRC as part of the Final Safety Analysis Report on June 29, 1981, under docket number 50-443. The NRC accepted the initial Seabrook Quality Assurance Program in Supplement 3 to the plant operating license Safety Evaluation Report (NUREG-0896), in July 1985. In July 1986, the NRC issued Supplement 5 to NUREG-0896, which accepted modifications to the originally submitted QA program. The program is currently maintained as Chapter 17.2 of the Seabrook Station Updated Final Safety Analysis Report.

On March 31, 2006, FPL, FPL Energy Seabrook, and FPL Energy Duane Arnold submitted a common Quality Assurance Topical Report (QATR) for NRC review and approval in accordance with the provisions of 10 CFR 50.54(a)(4). When approved, the subject FPL/FPL Energy nuclear units intend to apply the common 10 CFR 50 Appendix B quality assurance program to ISFSI activities. The March 31, 2006 submittal included the 10 CFR 72.140(d) notifications applicable to a common QATR.
