Subject: Request for Amendment to Nuclear Materials License No. 24-32318-01

Dear Mr. Mullauer:

On July 12th 2006, Pangea Group (Pangea) was the subject of an unannounced inspection by Ms. Deborah A. Piskura, of the Materials Inspection Branch. Over the course of the inspection, she noted that there were two items on our Nuclear Materials License, No. 24-32318-01, which required updating. This letter has been written in response to those observations; to update the license to correctly reflect the personnel and locations involved in its administration. Both observations made by Mr. Piskura have been identified and addressed below:

Observation 1

Section 10 indicates that byproduct material may be analyzed at 743 Spirit 40 Park Drive, Suite 232, Chesterfield, Missouri, but this is no longer the case.

Response

On July 19, 2004 Pangea submitted a request for amendment to its license in order to reflect the change in address of the corporate office. The address in section 2 was correctly changed to Pangea's new corporate address of 2604 S. Jefferson, St. Louis, MO 63118. Unfortunately, the address in section 10 was not also updated. This has been addressed by the enclosed Form 313.

Observation 2

Section 11(B) lists Daniel Hoffman as the Radiation Safety Officer for the license, but is no longer employed by Pangea. While you (Matt Cushman) are acting as the interim RSO, the license needs to be amended to indicate the identity of the current RSO.

Response

This has been addressed by the enclosed Form 313. Matthew Cushman will be the Radiation Safety Officer for the License. His resume has been included and reflects the both his qualifications and his wide variety of experiences in administering a radiation safety program and it's associated license requirements.

REC'D JUL 18 2006

315581

The requested license amendment herein should address any concerns prompted by the recent inspection of Ms. Piskura. If any further information is needed, please do not hesitate to contact me at one of the numbers listed below.

Respectfully Submitted

Matthew Cushman.
