

Note to file regarding mail control 139457
Sentara Hospitals
45-00131-02
03003298

Regarding the resubmitted request to add Dr. G. Stephen Brown as authorized user (AU) for 35.300 (third sub-category):

This request was initially presented as part of mail control 138894 (letter dated 6/19/06 plus attachments). See ADAMS accession number ML062160496 for telephone conversation record from that licensing action.

Dr. Brown holds ABR certification in Therapeutic Radiology. He was authorized user for 35.300 under University of Vermont license in 1977, as confirmed by Tom Kellogg of the U Vt Radiation Safety Office (802-656-3283). Per discussion with Pam Henderson, branch chief, Dr. Brown may be named as AU for this use based on a combination of 10 CFR 35.57(b)(1) and 35.59, if he shows significant recent related training and experience. Licensee documented the following for 2006: 4 supervised Y-90 Zevalin treatments [the 4th is described in e-mail from RSO Sandy Wolff (ADAMS accession number ML062770296)], a description of Sandy's familiarity with his training, 2 Zevalin vendor training sessions, supervised experience in all tasks described in 35.396(d)(2), and multiple preceptor attestation statements. Based on this information, I have concluded that Dr. Brown meets the requirements of 10 CFR 35.59.

/RA/ Sandy Gabriel
Senior Health Physicist
