RE: Lost Nuclestat Nuclear Static Eliminator

Dear Sir:

This letter is to inform you of the loss of a Nuclestat Nuclear Static Eliminator. The device was leased on 11/21/2005. Serial # A2EU341 from NRD LLC, lease # 031472, model P-2021-8000.

Our facility at 1601 W. Hamlin Rd. Rochester Hills, MI. 48309 used the device to eliminate static electricity on automotive parts prior to painting. The device was last used in July of 2006. We were unable to locate the device in October of 2006, and believe it was lost or stolen. We have searched the facility and questioned current and past employees who had access to the device but were unable to locate it.

In the future, all devices will be kept under lock and key by a company supervisor until said device is needed. Upon completion of the task, the device will then be returned to the supervisor for safekeeping.

Sincerely,

John Stempowski  
Purchasing Manager

A handwritten signature in black ink, appearing to read "J. Stempowski", with a long horizontal flourish extending to the right.
