**Subject:** Liquid Radioactive Release Lessons Learned Task Force Final Report

The subject NRC Task Force Final Report is attached for your information.

The focus of the task force was on releases of radioactive liquids that were neither planned nor monitored. The most significant conclusion of the task force regarded public health impacts. Although there have been a number of industry events where radioactive liquid released to the environment in an unplanned and unmonitored fashion, based on the data available, the task force did not identify any instances where the health of the public was impacted.

If you have any questions regarding the report, please contact Timothy Frye, Office of Nuclear Reactor Regulation, by e-mail at [tjf@nrc.gov](mailto:tjf@nrc.gov) or by telephone at 301-415-9676.
