Re: License 47-09576-01

03003399

Per our phone conversation October 17, 2006, we intend to temporarily store the HDR unit in an approved area. This is necessitated by the construction of a secure closet within the HDR treatment room. The areas to be used for this temporary storage area are already approved for sources awaiting installation or shipment. This will not affect the treatment area; only provide a temporary secure location for the HDR unit and source during a construction project. Currently the project is scheduled to begin October 22 thru October 28. During that time the HDR unit and associated source within the unit will be located in either the just approved storage area (amendment 47) or the old storage area that has yet to be de-commissioned. The areas surrounding the temporary storage location will be surveyed to insure adequate radiation protection for employees and the general population. Should you have any questions regarding this matter I can be reached at (304)526-1143 or by pager (304) 361-1828.

Sincerely,

Michael H. Biddy
Radiation Safety Officer
St. Mary's Medical Center
