

November 3, 2006

Dr. Ethel Eaton, Manager
Office of Review and Compliance
Virginia Department of Historic Resources
2801 Kensington Avenue
Richmond, VA 23221

SUBJECT: NORTH ANNA EARLY SITE PERMIT REVIEW (TAC NO. MC1128)

Dear Dr. Eaton:

In your August 9, 2006, letter to the U.S. Nuclear Regulatory Commission (NRC), you recommended an additional archaeological survey with respect to the North Anna ESP site described in the application of Dominion Nuclear North Anna, LLC (Dominion or Applicant) for an early site permit (ESP). On September 21, 2006, Dominion forwarded the report "*Archaeological Survey, Dominion Early Site Permit Project, North Anna Power Station, Louisa County, Virginia,*" to your office. The report provides the results of an archaeological survey for the area of potential effects associated with potential future site development at the North Anna ESP property. With the exception of two previously recorded historic period cemeteries (Sites 44LS0221 and 44LS0222), no artifacts, cultural features, or cultural deposits were identified during the subsurface testing and pedestrian activities. The report concludes that additional evaluation would be required to determine if either of the cemeteries is eligible for inclusion in the National Register of Historic Places. Both cemeteries would be avoided during any construction activities associated with future development at the North Anna ESP site.

Based on results outlined in the report, and following a telephone conference on October 12, 2006, with Mr. Roger Kirchen of your office, the NRC concludes that there would be no adverse effect upon historic properties resulting from the North Anna ESP (see 36 CFR 800.5). This finding also satisfies the NRC's consultation responsibilities for this undertaking under Section 106 of the National Historic Preservation Act.

E. Eaton
