SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 49-27673-01

On August 11, 2006, you contacted the U.S. Nuclear Regulatory Commission (NRC) and indicated that you wished to terminate your NRC radioactive materials license. The supporting documentation to your NRC Form 314 dated August 11, 2006, stated that all radioactive material had been transferred to Worthington, Lenhart & Carpenter, Inc., who is authorized to accept the material under NRC License No. 49-27067-01.

The supporting documentation to the NRC Form 314 also provided a copy of the leak test result dated March 8, 2006, for one (1) Troxler Model 3450 gauge. The leak test result documents that there was no evidence of leakage of radioactive material from the sealed source. Based on the documentation submitted, the staff concluded that all licensable radioactive material has been removed from the facility and the facility at 1461 Bryan Stock Trail, Casper, Wyoming, is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 02 to License number 49-27673-01, authorizing your license termination. An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

If you have questions or require clarification on any of the information stated above, please contact me at (817) 276-6552.

Sincerely,

/RA/

Rachel S. Browder, Health Physicist
