RE: HDR Commitments
License #52-25487-01
Control #139252

03035220

Dear Ms. Weidner:

Based on the telephone conversation on October 10, 2006, we will commit to the following:

1. We will place the HDR in storage until an authorized medical physicist is added to the license.
2. David Rhoe will receive refresher training from the manufacturer regarding regulatory issues associated with the HDR and the HDR emergency procedures. David Rhoe has provided radiation safety consulting for Hospital Andres Grillasca, Inc. for their HDR and Radiation Oncology Department during 2002, 2003, and 2004. The training will be provided when the HDR is removed from storage and the source is replaced. Currently, the HDR source is due for source replacement; however, until a qualified medical physicist is added to the license, the source will not be replaced.

If you need additional information, please feel free to contact me at 787-764-5666.

Sincerely

Guido Umpierre Maymi
