Mr. Robin DeLaBarre
U.S. Department of State
2201 C Street, N.W.
NP/NE, Room 3320
Washington, DC 20520

Dear Mr. DeLaBarre:

Enclosed is an application received by the U.S. Nuclear Regulatory Commission from Precision Energy Services (PES), Inc., for a specific license (CBP0063) to export Category 2 quantities of radioactive byproduct materials (Americium-241 and Cesium-137), to India, with a proposed expiration date of January 31, 2012. The sealed sources will be used in petroleum exploration well logging service operations. The exported material will remain in the custody of PES employees and when not mobilized in support of field activities will be stored in secure PES facilities. Since India is on the restricted destinations list (110.29), before taking action on this new request, we would appreciate your views, in accordance with established procedures and from the overall perspective of the Executive Branch, as to whether the requested export meets the applicable criteria in the Atomic Energy Act of 1954, as amended.

Sincerely,

/RA/

Stephen Dembek, Section Chief
Export Controls and International Organizations
Office of International Programs
