MEMORANDUM TO: Tim Harris, Branch Chief
Source Safety & Security Branch, MSSA

FROM: Tomas Herrera */RA/*
Source Safety & Security Branch, MSSA

SUBJECT: SUMMARY OF MEETING WITH ENVIRONICS USA,
OCTOBER 10, 2006

Environics USA representatives requested a meeting with NRC staff, on October 10, 2006, to discuss a potential amendment to their current exempt distribution license and sealed source and device registration certificate for chemical agent detectors.

The meeting was an opportunity for Environics USA to discuss two new devices that they propose to amend to their license and registration certificate.

One of the devices that Environics USA proposes to add to their license and registration certificate is virtually identical to their currently registered device. The only difference includes some additional detectors. The source and source housing will not be changed.

The new proposed device is a mounted device instead of portable, the internal components will be similar to Environics USA's portable devices. NRC will determine when it receives the amendment request, if the device may be amended to the registration certificate or if a new registration certificate will have to be issued.

The objective of the meeting was to answer questions from the Environics USA representatives, and to relay NRCs expectations on what should be included in the amendment request.

Participants:

NRC Staff:

John P. Jankovich
Tomas Herrera

Environics USA:

Robert Howard
Rolf Meinholtz
