Summary:	I spoke with Dr. Grant about the radiation safety program. Dr. Grant indicated that there is currently only one individual using Carbon-14 for experiments. The other individual left the college in July of 2005. Between the two individuals, licensed material was only ordered four times since 2001. A close-out survey for laboratories no longer to be used for the use of radioactive materials is in progress. It will be submitted to the NRC once it is completed. Surveys are performed by the researchers each time they complete use of licensed material. No radioactive contamination was documented. I thanked Dr. Grant for the information.
