MEMORANDUM TO: Douglas W. Weaver, Chief
New Reactor Infrastructure Guidance Development Branch
Division of New Reactor Licensing
Office of Nuclear Reactor Regulation

FROM: Cornelius F. Holden, Director /RA/
Division of Risk Assessment
Office of Nuclear Reactor Regulation

SUBJECT: TRANSMITTAL OF NEW STANDARD REVIEW PLAN SECTION 17.6,
"MAINTENANCE RULE"

The purpose of this memorandum is to transmit the proposed new section to NUREG-0800, Standard Review Plan (SRP), Section 17.6, "Maintenance Rule." This document is technically complete, formatted in conformance with LIC-200, "Standard Review Plan Process," and is designated "publicly available."

In accordance with the staff requirements memorandum dated May 10, 2005, on the April 6, 2005 Commission meeting, the Office of Nuclear Reactor Regulations and the Office of New Reactors (NRO) have proposed a new SRP Section 17.6 (Enclosure).

In addition, this section has been prepared in accordance with NRR Office Instruction, LIC-200. The administrative update is comprised of assigning the review responsibilities by function, with the responsible organizations maintained separately from the SRP itself to minimize impacts of office reorganizations, and editorial and formatting changes. The revision also adds standard paragraphs to extend application of the updated SRP section to prospective submittals by applicants pursuant to 10 CFR Part 52.

The staff has determined that the changes do not involve any new staff positions. Most of the SRP sections will be issued as final versions without publishing them as draft and requesting comment. The staff is revising the SRP in this manner to provide a more up-to-date SRP in light of the requirement in 10 CFR 50.34(h) for an applicant to evaluate its facility against the SRP revision in effect six months before the docket date of the application. In addition, this memo and its enclosure will be made publicly available as a preliminary SRP section. The SRP section will be formally published following reconciliation against the ongoing Part 52 rulemaking and regulatory guide updates including Regulatory Guide 1.206, "Combined License Applications for Nuclear Power Plants (LWR Edition)." After formal issuance, the SRP will be

available for public comment. Comment resolution will be addressed in subsequent SRP revisions. Prior to revision to individual sections, comment resolution may establish a basis for how alternatives to the NUREG-0800 acceptance criteria provide an acceptable method of complying with the NRC's regulations.

For questions concerning this document, please contact Stephen Alexander at 301-415-2995.
