Subject: MW-51 &52

John,

The sample dates are:

MW-51: 5/11/2006
MW-52: 6/02/2006

Monitoring well 51 samples were split with NRC / DEC on 4/11/2006. Monitoring well 52 was offered to NRC / DEC for splitting on the same date, DEC / NRC declined to split because it was an open borehole (packers not yet installed). Packers for MW-52 should be installed in about four weeks.

I will send our draft proposed investigation levels / trigger values, and EPA Tritium data in a separate e-mail.

Jay Adler
