**Subject:** Pump Test

Hello Jay,

We understood that Entergy would be providing DEC and NRC with the draft plans for the pumping test @ RW-1 prior to finalizing it. We recently received the "Hydraulic Control Plan" and are reviewing it, but as of yet have not received anything describing the pumping test. Can you find out what the status of this plan is and share it with us and the NRC as soon as it is ready for us? If I remember correctly, Entergy was planning to do the test either late this month or early next month, so time is getting short.

Thanks,  
Tim
