PROPOSED RULE CHANGE

WAC 246-235-075 (2)(c) — A ~~((schedule))~~ means for adjusting cost estimates and associated funding levels periodically over the life of the facility or facilities.

This change would offer more flexibility to the licensee's plan.

WAC 246-235-075 (5)(a) ~~((The department shall review each decommissioning funding plan prior to license issuance and prior to license renewal.))~~ The applicant or licensee shall submit to the department an initial decommissioning funding plan prior to license issuance and shall submit an updated plan at intervals not to exceed three years.

(b) The applicant or licensee shall incorporate department comments into the decommissioning funding plan including its cost estimate and shall revise its financial surety accordingly.

(c) Applicants shall obtain the appropriate financial assurance as approved by the department prior to receipt of licensed material. The department may issue a new license if the applicant agrees to comply with the decommissioning funding plan as approved. If the applicant defers execution of the financial instrument until after the license has been issued, a signed original of the financial instrument obtained to satisfy the requirements of this section shall be submitted to the department before receipt of licensed material.

(d) ~~((Holders of licenses issued on or before the effective date of this rule shall submit a decommissioning funding plan to the department by April 1, 1993.))~~ Licensees shall implement the financial assurance requirements within thirty days of receiving department approval of the initial or updated decommissioning funding plan.

These changes increase the frequency for updating decommissioning funding plan and cost estimate from 5 years to 3 years to keep pace with rising costs. It also removes outdated verbiage.
