

October 31, 2006

Mr. Edward Wolbert, President  
Transco Products, Inc.  
55 E Jackson Boulevard  
Suite 2100  
Chicago, IL 60604

Dear Mr. Wolbert:

As requested, this letter confirms that the U.S. Nuclear Regulatory Commission (NRC) received your application dated October 6, 2006, requesting the license required for the export to the People's Republic of China of: 1) thermal insulation for use in reactor vessels and in other primary/secondary equipment; 2) piping, and emergency core cooling strainers; 3) raceway fire barriers; and 4) firestop seals. This equipment as well as spare and replacement parts that may be needed for this equipment will be used in various nuclear power reactors including the reactors located at the Qinshan and Daya Bay sites. Based on our preliminary review, NRC staff has determined that the information required to process this type of export license application has been provided and case number XCOM1183 and docket number 11005656 have been assigned to this action.

In accordance with established procedures, NRC forwarded this request to the Executive Branch for review. Upon receipt of favorable Executive Branch views regarding the proposed exports of the equipment, and upon NRC's independent verification that relevant statutory and regulatory requirements for such exports have been met, the export license will be issued. At present and based on the limited review performed to date, NRC staff is not aware of any questions or issues that would prevent the issuance of this export license. Should any questions or issues arise during our review, we would contact you immediately to discuss and try to resolve.

Sincerely,

*/RA/*
