Dear Mr. McCann:

**BATTELLE REQUEST FOR AN EXTENSION TO THE END DATE FOR NRC MATERIAL  
LICENSE SNM-00007**

Battelle is requesting an extension to the end date of NRC Material License SNM-00007. While Battelle intended to complete license termination activities prior to the SNM-00007 license termination date of December 31, 2006, this no longer appears feasible based on the additional time it has taken to obtain radionuclide analyses of supplemental groundwater samples at the new monitoring well locations. Based on this planned activity and a duration extending into early November 2006 to send the compiled results to the NRC in report form, Battelle requests an extension of the end date of our license. Battelle recognizes that the report on the results of the supplemental groundwater monitoring is critical to the continuation of the license termination process and its requirements and is committed to being an active participant in a timely license termination process.

Sincerely,

Joe Jacobsen  
BCLDP Radiation Safety Officer
