RE: NRC License Amendment Request  
License # 29-30840-01  
Docket # 030-36447 030 36417

RLJ

To Whom it May Concern:

Please accept this letter as a request to amend our existing NRC license to reflect the addition of the clinical imaging space shown on the attached revised room diagram. The imaging equipment to be installed is as follows:

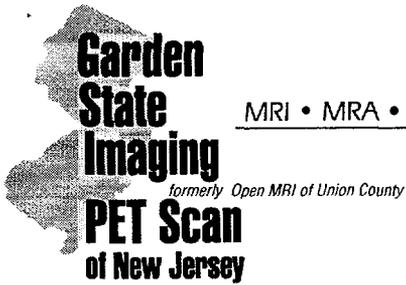

Elscent Apex SP Single Head Scintillation Camera Serial number 399011-20  
Elscent Apex Imaging Table Serial number 398511-046  
Elscent Apex SP Computer System Serial number 392011-51

All other Hot Lab and monitoring equipment, procedures and authorized users described in our initial license application remain unchanged except to reflect this new imaging area and the use of materials covered under 10CFR35.200.

Please amend our existing license to include any byproduct material permitted by 10CFR35.200, in any chemical or physical form and the amount authorized at any one time is as needed. These materials will be used under the supervision of Natalio Damien, MD, our Radiation Safety Officer and Authorized User.

We request that this amendment be expedited so as to provide a timely implementation of this service to our community.
