DLA-WH

SUBJECT: Defense Logistics Agency (DLA) Licensing for Radioactive Material
at Former Army Depots

TO: Regional Administrator
U.S. Nuclear Regulatory Commission
Region I
Materials Licensing Branch

1. In accordance with your letter of June 22, 1990, concerning radioactive commodities in the DoD supply system, stored at DLA activities, DLA will request an amendment for each applicable NRC license currently issued to the Army Major Subordinate Commands. In general, each amendment application will be forwarded for your consideration and approval at least 30 days prior to the expiration date for each license. However, DLA would like to reserve the right to accelerate the amendment process if, for some reason, mission dictates otherwise.

2. Included is a schedule of DLA license application submission dates along with the assigned NRC Region for each license and other pertinent information, per your request. If you have questions, please contact our safety and health office at (703)274-6027.
