**SUBJECT: BRAC Industrial Radiation Facility Close-Out and Termination Survey  
Report for Camp Kilmer, New Jersey**

New Jersey Department of Environmental Protection  
Bureau of Federal Case Management  
Division of Responsible Party Remediation  
ATTN: Mr. Greg Zalaskus, Federal Case Manager  
401 East State Street, CN 028  
Trenton, New Jersey 08625-0028

Dear Mr. Zalaskus:

The Industrial Radiation Historical Data Review Report for Camp Kilmer, New Jersey identified two (2) Base Realignment and Closure (BRAC) areas at Camp Kilmer as areas where radiological materials may have been used and/or stored. Both of these areas were surveyed in 1997 for potential radiological contamination. Enclosed for your review is the Industrial Radiation Facility Close-Out and Termination Survey Report for these two areas (i.e., Building 1072 and the outdoor Old Motor Pool Area). The survey report indicates that both areas are in compliance with the Nuclear Regulatory Commission (NRC) and State of New Jersey guidelines for the decontamination of facilities prior to release for unrestricted use.

According to the Industrial Radiation Historical Data Review Report, no NRC licenses or Department of the Army Radiation Authorizations (DARAs) were ever issued specifically to Camp Kilmer or to any units assigned there. According to the U.S. Army Center for Health Promotion and Preventative Medicine (USACHPPM), the licenses issued to the U.S. Army for the radiological materials used or stored in the 2 Camp Kilmer BRAC areas are the following:

CECOM: 29-01022-14  
IOC: 12-00722-07  
ACALA: 12-00722-06

*No action needed*
