Subject: (NOTE: This will be used as the Documents Title in ADAMS)	RAI, Moving 35.200 areas	
Summary:	I verified that the camera location was not moving and that they only use sealed sources and Technicum-99m products. They are requesting changing areas within the facility. I informed Mr. Ginsberg that they only need to notify us of the change within 30 day per 35.14 notifications. Mr. Ginsberg said that they plan on having the modifications complete by end of December. I told him that the licensing action was due by January 10 and must be voided or completed by then. We agreed to keep the action open and he would send in the configuration changes after they were completed, including a new location for a camera that was not going to be obtained some time in the future.	
Action Required:	Place into records. Hold licensing action open until configurations are completed.
