Gentlemen:

Request that US Army Communications and Electronics Materiel Readiness Command's Byproduct Material License Number 29-01022-11 expiration date be extended for three months.

This extension of license expiration date is requested due to the complete revision of supporting documentation to license including revision of engineering drawings, technical manual and depot maintenance work requirements, and coordination and staffing of revision with the major Army field commands and other Department of Defense services.

Please acknowledge receipt of correspondence on enclosed DA Form 209 Reply Card.

Sincerely,

for J. Louis Crawford

1. Reference FONECON between Mr. Darwin N. Taras, DARCOM Safety Office, and Mr. Steven A. Horne, this headquarters on 19 June 1979, subject as above.
2. As licensee for the MX-7338/PDR-27R Radioactive Test Sample which is controlled under subject license, it is requested that an extension from the expiration date of 31 August 1979 be granted for an additional period of three months.
3. This extension is requested due to the complete revision of the supporting documentation of subject license including revision of engineering drawings, technical manual and depot maintenance work requirements, and coordination and staffing of this revision with the major Army field commands and other DOD services. It is expected that staffing will be completed about 17 July 1979. It is anticipated that recoordination and restaffing will be necessary.
