

United States Nuclear Regulatory Commission

Washington, DC 20555

Import License

Pursuant to the Atomic Energy Act of 1954, as amended, and Title 10, Code of Federal Regulations, Chapter 1, Part 110, a license is hereby issued to the licensee designated below authorizing the import of nuclear materials and/or facilities into the United States of America in accordance with the statements and representations made by the licensee in the application referenced below. This license is subject to all applicable rules, regulations, and orders of the United States Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

NRC License Number: IW016

Expiration Date: 12/31/2009

Application Date / Reference Number:

Letter Dated: 02/03/2006

U.S. Licensee/Receiving Facility:

Eastern Technologies, Inc. (ETI)
215 2nd Avenue
Ashford, Alabama 36312

Attn: Douglas Kay

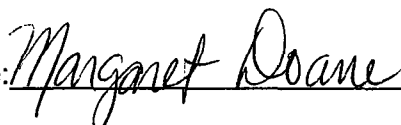

Quantity and Type: Polyvinyl alcohol (PVA) based (i.e., dissolvable) protective clothing and related products, including zippers, hook and loop closure material, elastic and non-PVA thread, contaminated with low-levels of source, special nuclear, and/or byproduct materials resulting from nuclear power plant operations and maintenance. The radioactive contaminants will consist of mixed fission products and/or corrosion activation products including Cobalt-60, Cobalt-58, and Manganese-54. The total quantity or activity level of all radioactive contaminants combined should not exceed five (5) Curies over the duration of this license. The specific activity levels of each radionuclide authorized for import and that will be received at licensee's site at any given time over the duration of this license shall not exceed the individual levels specified in licensee's domestic possession license. Secondary waste resulting from the decontamination process will be classified as Class A waste.

Point of Origin: Laguna Verde Nuclear Power Plant, Units 1 and 2, Veracruz, Mexico

End Use: Licensee will receive and treat PVA-based protective clothing and related products from the Laguna Verde Nuclear Power Plant in Mexico. These materials will be treated with similar materials received from licensee's domestic customers. Services provided including management of associated decontamination waste are subject to the terms and conditions of the license issued to ETI by the State of Alabama.

Authorized For the U.S. Nuclear Regulatory Commission By:

Name: Margaret M. Doane, Deputy Director
Office of International Programs

Signature: 

Date of Issuance: November 1, 2006

License Condition: This NRC license authorizes import only. Licensee is responsible for compliance with any and all additional Federal and State requirements that apply, including all terms and conditions of its domestic materials licenses.
