Department of the Army
Commander
U.S. Army Material Development and
Readiness Command (DARCOM)
ATTN: Darwin Taras
5001 Eisenhower Avenue
Alexandria, VA 22333

Gentlemen:

Please find enclosed license number SNM-1900 and amendment number 1 to SNM-1896. With regard to your follow-up letter dated July 16, 1982, please note the following:

1. As agreed in our meeting on June 25, 1982, we have issued separate licenses for radfac sets AN/UDM-7C and AN/UDM-6, and modified Condition 10.
2. Although Condition 12 is not the same as requested in your follow-up letter dated July 16, 1982, the wording of this condition was specifically agreed to by Mr. Horne in our meeting on June 25, 1982.
3. As discussed in our meeting on June 25, 1982, Condition 14 has been modified to eliminate the problem that some Army personnel may misinterpret this condition to mean that CECOM health physicists should personally conduct physical inventory of licensed materials world-wide. Please note that Condition 17 does reference Supplement E of your application. We do not believe you will have any compliance problem with Condition 14 as presently worded.

Sincerely,

John W. N. Hickey, Section Leader
Industrial Section
Material Licensing Branch
Division of Fuel Cycle and
Material Safety
