Subject: IPEC status report for August 3, 2006

Indian Point Energy Center

Status Report

Information in this record was deleted
in accordance with the Freedom of Information
Act, exemptions 6
FOIA- 2006-314

C-14

August 3, 2006

Operational Status

Indian Point Unit 2 is operating at 100% power and has been on line 76 days. Indian Point Unit 3 is also at 100% reactor power and has been on line 12 days.

Groundwater Investigation Update

- * Drilling for the phase 2A monitoring wells, which are designed to characterize the extent of Sr-90 contamination on site, continues. Five wells have been drilled with 2 more in progress.
- * Engineers are reviewing the DVD from the video inspection of the IP2 spent fuel pool liner. The video inspection covered the area between the liner and the fuel racks. Tight clearances in some spots caused some difficulty while filming.
- * The demineralizer system that will filter out Sr-90 from the IP1 spent fuel pool should be in service next week. Previous efforts to lower the concentration of Sr-90 with a demineralizer system have been successful.
- * The leak collection box on the IP2 spent fuel pool crack continues to show about 100 ml/week
- * Hydrologist are installing packers in MW-30, located in the IP2 spent fuel building
- * Samples from the LaFarge plant, located south of Indian Point, continue to show no detectable activity above background levels
- * Entergy has drilled a remediation/recovery well in the IP2 spent fuel pool building (RW-1). The well may be a potential remediation point. Entergy is investigating a Pilot Program using the well to contain the spread of tritiated water from IP2. Water would be withdrawn through the well to form a zone of depression and hold-up further from IP2 toward the river. This technique has been used successfully at other locations to contain the spread of contamination and enhance the efficiency of other remediation techniques.

Educational Outreach

Entergy Nuclear Northeast provides customized outreach education programs for schools, youth groups, and civic organizations. The topics we cover include Emergency Planning, Understanding Radiation, Nuclear Fuel and a general overview of the operations of Indian Point Energy Center. If you would like a brochure or are interested in scheduling a program, contact IPEC Communications at 914-271-7441.

If you have any questions or need clarification of the information provided, please contact Kathy McMullin, manager of communications, Indian Point Energy Center, at 914-271-7132.
