To whom it may concern:

03036047

Coal-Mac Inc. has purchased a Thermo-Electron's ECA Analyzer, which is a belt analyzer to give the analysis of coal transferring on a belt line. The analyzers serial number is 861012 and the source used is Californium 252 (20mci) and Cesium 137 (30mci) which is covered in our NRC License # 47-25599-01 for two other units we are currently using. The analyzer is due to be delivered to the Holden #22 facility at the end of November 2006. I am hoping to have this license amended to accept this unit, so we can order the sources to be in when the unit arrives.

If you have any questions regarding this matter, please call me at (304) 475-5116-ext.1212 or (304) 239-2910, ext. 4.

Sincerely

Charles R. Waine/RSO
 Coal-Mac, Inc.
 Manager of Coal-Prep and Loadouts
